

Maple Grove Elementary School

- Located in Greenwood, IN
- Owner: Center Grove Community School Corporation
- 110,000 s.f. new construction
- Project Description: Maple Grove Elementary is designed for an enrollment of 600 students in kindergarten through fifth grade. A primary and intermediate wing are organized around two courtyards. The intermediate wing includes science, music and art classrooms. The central core of the building houses common functions such as administration, the media center, special education, Title I, speech/hearing, testing and small group instruction. The gymnasium with seating for 250, large group instruction, and cafeteria are separated from the academic wings to facilitate use after hours. LGI has a movable partition that can be opened to the cafeteria and a platform stage opens to the gym. The facility was designed to receive a second identical elementary school in the future. To maximize savings, the kitchen and mechanical room are sized for both schools.
