

## Purdue University Softball Field

- Located in West Lafayette, IN
- Owner: Purdue University
- Renovation: 3 acres
- Project Description: The Purdue University varsity softball field had a very functional and very playable surface but lacked any aesthetic appeal and limited player and spectator amenities. The planned renovation of the field included the addition of new dugouts with team restrooms, new public toilets, a new 2 story pressbox and concessions area and a new team room addition to an adjacent storage building. The planned renovations include mounding of the area behind home plate to create a spectator area that pulls the fans closer to the home plate action. The addition of outdoor café seating with views of the field was planned to increase the variety of spectator experience at the field. The field was completed with a renovation and addition to the parking lots, new signage and perimeter planting that defines the professional quality of the field. This project is currently on hold pending funding.
